Jerome County requires a Building Permit before ANY construction can begin.

Double Fees may be levied whenever construction has begun prior to obtaining a building permit.

For mechanical applications and all other information, please visit our website,

<http://www.jeromecountyid.us/158/Building-Department>

Prior to obtaining a building permit, you should determine whether your project meets appropriate zoning requirements and whether there are any floodplains or other engineering restrictions.

All Building Permits require a Zoning Permit (Application included) to be reviewed and approved by the Zoning Administrator. Zoning must be approved before your application will move to the Building Department for review.

Zoning Requirements:

1. Structures under 120 square feet may require a Zoning Permit, but not a Building Permit unless the structure is attached to an existing building, then a Building Permit will be required.
2. One story detached accessory structures used as tool and storage sheds, playhouses and similar uses, provided the floor area is not greater than 120 square feet do not require a building permit.
3. Any building structure over 120 square feet will require a building permit.
4. Agricultural buildings will require a Zoning Permit and an AG Siting Permit only.

Current Adopted Codes

- 2018 International Building Code, (IBC)
- 2018 International Energy Conservation Code (IECC)
- 2018 International Mechanical Code (IMC)
- 2018 International Fuel Gas Code (IFGC)
- 2018 International Existing Building Code (IEBC)
- 2018 International Fire Code (IFC)

Design Criteria

Wind Speed: 115 mph

Wind Exposure: C

Ground Snow Load: 30 PSF

Seismic Design Category: C

Presumed Soil Bearing Pressure: 1500 PSF without soils investigation

Frost Depth: 24 inches

Elevation: 4048 feet above sea level

Climate Zone: 5B

A105.5 **EXPIRATION:** Every permit issued shall become invalid unless the work authorized by such permit is commenced within **180 days** after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of **180 days** after the time the work is commenced. The building official is authorized to grant, in writing, one or more extensions of time, for periods not more than 180 days each. The extension shall be requested in writing and justifiable cause demonstrated.

Commercial Permit Application Requirements

All plans for commercial projects must be prepared and wet stamped by an Idaho Registered architect or engineer.

All plans submitted shall comply with the currently adopted International Building Code, International Fire Code, International Energy Conservation Code, as well as the Americans with Disabilities Act.

1. Building permit application completed.
2. Property deed / Document to show title and legal description.
3. Real Property Summary sheet (assessor's office)
4. City sewer and water permit copies, when applicable. 208-324-8189
5. Septic permit when applicable. (Health Department 208-324-8838)
6. Fire Department letter.
7. Highway Department Permit, if accessing the property from the main road.
8. **THREE COMPLETE SETS OF PLANS: (Four sets if connecting to City sewer & water)**
 - Scale ¼" = 1'0"
 - Minimum paper size 18"x 24"
 - Code analysis attached to the plans.
 - Special Inspection(s) if required. (Indicate type of inspections and list the name of the agency to perform such inspections.)

 - Site plan
 - Parking
 - Lighting
 - Floor plan
 - Foundation plan.
 - Building elevations.
 - Typical building section or wall section, showing construction system.
 - Floor and roof framing plan.
 - Construction detail for all firewalls including penetrations.
 - Complete door, window, hardware, and finish schedule.
 - Electric plan showing emergency lighting and exit signs.
 - Plumbing plan showing fixtures.
 - Mechanical plan with computations and specifications prepared and designed by a registered professional.
 - Energy Code compliance work sheets. (Envelope, Lighting, and Mechanical)
 - Type and location of fire extinguishers and fire protection system.
 - MSDS Sheets: 3 copies of the Material Data Safety Sheets, including clearly indicated quantities and locations of chemicals and/or hazardous materials.
 - Metal Building Drawings and Calculations: Metal building drawings and structural engineering calculations will be required for all pre-fabricated metal buildings, including concrete footing details. Calculations must be stamped and signed by an Idaho Registered Engineer or Architect.
 - Modular Buildings: Structural engineering calculations will be required for the foundation design for all modular buildings. Calculations must be stamped and signed by an Idaho Registered Engineer or Architect. Modular buildings are required to have Idaho Division of Safety approval.

Sprinkler System: Yes:_____ **No:**_____ **Exit Signs: Yes:**_____ **No:**_____

Maximum Floor Area Allowed:_____ **Emergency Lights: Yes:**_____ **No:**_____

Special Inspections Required? Yes:_____ **No:**_____ **Lighting Layout & ComCheck: Yes:**_____ **No:**_____

Firewalls Required? Yes:_____ **No:**_____ (If Yes, please provide cross section & UL Listing)

Occupancy Separation Required? Yes:_____ **No:**_____ (If Yes, please provide cross section & UL Listing)

Area Separation Required? Yes:_____ **No:**_____ (If Yes, please provide cross section & UL Listing)

Classified Areas? Yes:_____ **No:**_____ (If Yes, please show on plans and explain classification)

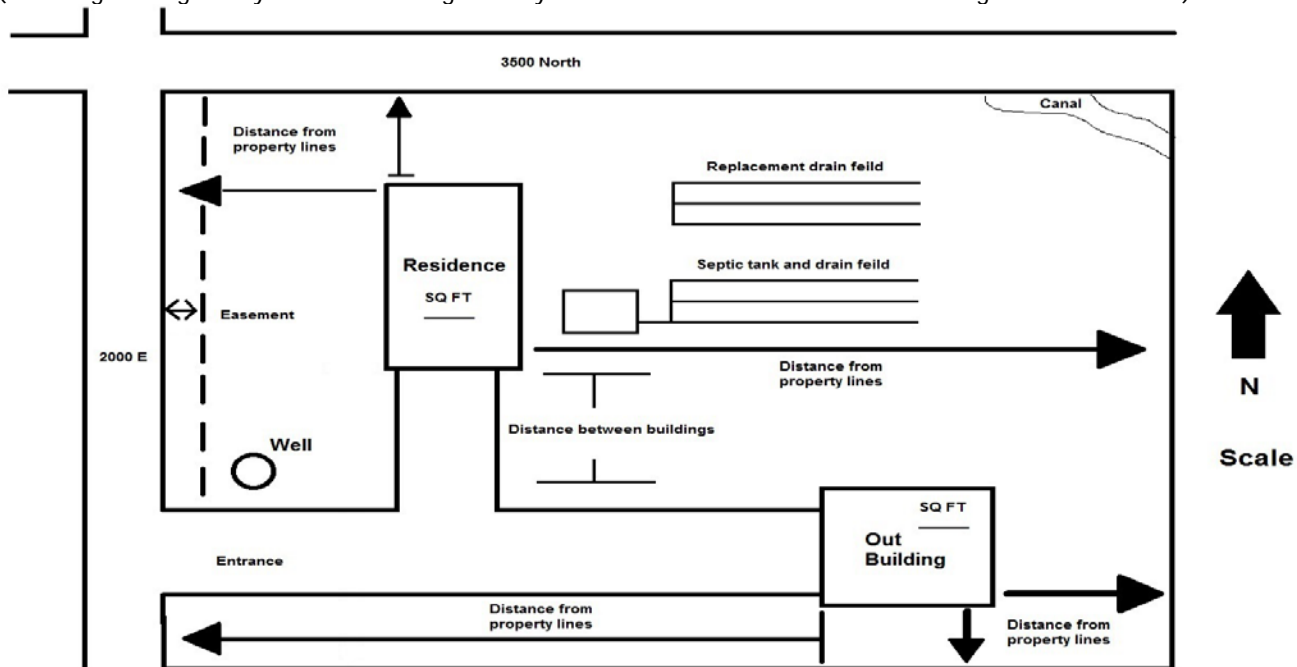

Other information:

SITE PLAN

The site plan should be drawn to an acceptable scale, showing the exact dimensions and the shape of the lot to be built upon and must include:

- ___ Scale
- ___ North Arrow
- ___ Property Lines w/dimensions
- ___ Proposed & Existing Structures
- ___ Square Footage of Proposed Structure
- ___ Distances Between Structures
- ___ Setbacks of Buildings to Property Lines
- ___ Location of Well, Septic, Drain Field
- ___ Location of Existing/Proposed Access
- ___ Road Name at Point of Access
- ___ Location of Easements (i.e. power, water, road, access)
- ___ Canals Ditches, Irrigation
- ___ Parking
- ___ Site Drainage System
 (Including drainage away from the building and any swale or retention area for on-site storage of surface water)
