Permit #

Staff Initials:

NAME: _____

PARCEL and/or ADDRESS: _____

REQUIRED PAPERWORK:

- * _____ Building and Zoning Permit Application
- * _____ Summary Sheet (Assessor's Office)
- * _____ Plans: (2 Sets)
- * _____ Property Deed _____ Subdivision Plat
(Deeds must be for individual lot & block)
- * _____ Manual S & J HVAC Calculations (New Homes Only) Emailed
- _____ Engineered Truss Drawings from supplier Emailed

AGENCY LETTERS:

- * _____ Health Department or City Letter Permit# _____
- _____ Highway Department Letter Access Permit
- _____ Fire Department 150' + Fire Dept Approval Required
- _____ Canal Company _____ (Name i.e. NSCC)
- _____ Other _____

_____ *Site Plan (2 Sets)

- _____ Scale
- _____ North Arrow
- _____ Property Lines w/dimensions
- _____ Proposed & Existing Structures
- _____ Structure Dimensions
- _____ Distances Between Structures
- _____ Setbacks of Buildings to Property Lines
- _____ Location of Well, Septic, Drain Field
_____ Community Well
- _____ Location of Existing/Proposed Access
- _____ Road Name at Point of Access
- _____ Location of Easements (i.e. power, water, road, access)
- _____ Parking
- _____ Canals Ditches, Irrigation
for on-site storage of surface water)

Roadway Public _____ Private _____

Address #'s Posted: Yes _____ No _____
(site only not for bldg)

<p>_____</p> <p>BUILDING DEPARTMENT APPROVAL</p> <p><u>THIS BUILDING PERMIT DOES NOT BECOME VALID UNTIL SIGNED BY THE BUILDING OFFICIAL AND FEES ARE PAID</u></p>								

Jerome County requires a Building Permit before ANY construction can begin.

Double Fees may be levied whenever construction has begun prior to obtaining a building permit.

Prior to obtaining a building permit, you should determine whether your project meets appropriate zoning requirements and whether there are any floodplains or other engineering restrictions.

All Building Permits require a Zoning Permit (Application included) to be reviewed and approved by the Zoning Administrator. Zoning must be approved before your application will move to the Building Department for review.

Zoning Requirements:

1. Structures under 200 square feet may require a Zoning Permit, but not a Building Permit unless the structure is attached to an existing building, then a Building Permit will be required.
2. Structures over 200 square feet will require a Building Permit.
3. Agricultural buildings will require a Zoning Permit and an AG Siting Permit only.
4. Fire Department letter, if the project is over 150 feet from the main road. An access road to Jerome County Fire Department requirements shall be installed prior to construction.

Current Adopted Codes

- 2018 International Residential Code, (IRC) Parts I-VI and IX including appendices A & B with amendments.
- 2018 International Energy Conservation Code (IECC) With 2012 amendments
- 2019 Idaho Manufactured Home Installation Standard.
- One-story detached accessory structures, provided the floor area is no greater than 200 feet, are exempt from permit.

Design Criteria

Wind Speed:	115 MPH
Wind Exposure:	C
Ground Snow Load:	30 PSF

Table R301.5 is amended to require a minimum uniform live load of 40 PSF in habitable attics and sleeping rooms.

Seismic Design Category:	C
Presumed Soil Bearing Pressure:	1500 PSF without soils investigation
Frost Depth:	24 inches
Elevation:	4048 feet above sea level
Climate Zone:	5B

R105.5 **EXPIRATION:** Every permit issued shall become invalid unless the work authorized by such permit is commenced within **180 days** after its issuance, or if the work authorized by such permit is suspended or abandoned for a period of **180 days** after the time the work is commenced. The building official is authorized to grant, in writing, one or more extensions of time, for periods not more than 180 days each. The extension shall be requested in writing and justifiable cause demonstrated.

For mechanical applications and all other information please go to our website

www.jeromecountyid.us/158/Building-Department

Two complete sets of plans must be submitted for review

(3 sets if connecting to City sewer & water)

Standards for Plans:

- Minimum size 18"x 24", Maximum size 24"x 36"
- Minimum Scale 1/4"
- Pages to be numbered and stapled

Content for Plans:

1. Site Plan:

- | | |
|---|---|
| ___ Scale | ___ Location of Well, Septic, Drain Field |
| ___ North Arrow | ___ Location of Existing/Proposed Access |
| ___ Property Lines w/dimensions | ___ Road Name at Point of Access |
| ___ Proposed & Existing Structures | ___ Location of Easements (i.e. power, water, road, access) |
| ___ Square Footage of Proposed Structure | ___ Canals Ditches, Irrigation |
| ___ Distances Between Structures | ___ Parking |
| ___ Setbacks of Buildings to Property Lines | ___ Site Drainage System |

2. Foundation/Floor Framing

- Foundation and required expanded footing shall include dimensions and reinforcement's type, size and locations.
- Cross section of the foundation and details. Show footing sizes, stem wall sizes and all rebar (quantity & sizes)
- Hold-down types or other embedded hardware for framing attachments, including locations
- All floor joists are noted with dimensions
- Floor framing plan, showing size of headers, all interior pony walls, and crawl space access
- Detail insulation material types with notes as to R-value, location and weather protection of thermal envelope for slab, foundation stems, mono footings, crawlspaces and/or basement walls
- Crawl Space Ventilation

3. Floor Plan/Roof Framing Plan

- Window and door sizes, type and location (Mark all egress and tempered windows)
- Show location of smoke detectors (inside each sleeping room, outside of each sleeping room and on each story of a dwelling)
- Carbon Monoxide Detectors outside all bedrooms
- Wall bracing Design (Exterior and interior) shall be clearly indicated and a schedule included which specifies the method of bracing to be used and the foundation attachments (IRC 602.10)
- Sheerwall's over 10' in height require state of Idaho engineered design
- Label intended use for all rooms and ceiling heights of each room
- Energy Compliance Path indicates on plans prescriptive method of compliance (showing all R-values and types.)
- Bathrooms vent system
- A minimum of one fully dimensioned building cross-sections from footing to roof with all materials specified. Include insulation baffles, roof framing, roof sheathing, roof covering and roof pitch
- Size, type and location of all bearing beams and/or headers
- Roof framing plan. Truss drawings. Showing truss layout, attic access, any interior bearing walls, and header locations. Engineering will be required on jobsite from truss manufacturer.
- Attic ventilation.
- Exterior elevations (North, East, West, & South sides) showing finish & height of walls
- Homes with stairs require cross section of Interior stairs showing rise and run, framing, handrails, guards, landings and headroom.
- Indicate location and types of fire separations, (including detail and UL/GA Listing) and construction methods to be used
- For remodeling or additions, show existing and proposed floor plan, additions show the proposed floor plan and are adjacent to the addition.
- Provide expanded floor plan for all rooms adjacent to the remodels or addition

SITE PLAN

The site plan should be drawn to an acceptable scale, showing the exact dimensions and the shape of the lot to be built upon and must include:

***Site Plan (2 Sets)**

- ___ Scale
- ___ North Arrow
- ___ Property Lines w/dimensions
- ___ Proposed & Existing Structures
- ___ Structure Dimensions
- ___ Distances Between Structures
- ___ Setbacks of Buildings to Property Lines
- ___ Location of Well, Septic, Drain Field
 - ___ Community Well
- ___ Location of Existing/Proposed Access
- ___ Road Name at Point of Access
- ___ Location of Easements (i.e. power, water, road, access)
- ___ Parking
- ___ Canals Ditches, Irrigation
(for on-site storage of surface water)
